CONTENTS

Formation of Mutagens During Cooking and Heat Processing of Foods

Preface 3

T. Sugimura. Past, present, and future of mutagens in cooked foods 5

S. Nishimura. Chemistry of mutagens and carcinogens in broiled food 11

J. S. Felton, M. G. Knize, N. H. Shen, B. D. Andresen, L. F. Bjeldanes, and F. T. Hatch. Identification of the mutagens in cooked beef 17

M. W. Pariza, W. A. Hargraves, H. Benjamin, M. Christou, C. R. Jefcoate, J. Storkson, K. Albright, D. Kraus, P. Sharp, G. A. Boissonneault, and C. E. Elson. Modulation of carcinogenesis by dietary factors 25

H. Hayatsu, T. Hayatsu, and Y. Wataya. Use of blue cotton for detection of mutagenicity in human feces excreted after ingestion of cooked meat 31

C. G. Edmonds, S. K. Sethi, Z. Yamaizumi, H. Kasai, S. Nishimura, and J. A. McCloskey. Analysis of mutagens from cooked foods by directly combined liquid chromatography-mass spectrometry 35

H. Rapoport, A. L. Waterhouse, C. M. Thompson, and J. F. O'Connell. Synthesis and radiolabeling of heterocyclic food mutagens 41

W. D. Powrie, C. H. Wu, and V. P. Molund. Browning reaction systems as sources of mutagens and antimutagens 47

D. Yoshida, T. Matsumoto, H. Okamoto, S. Mizusaki, A. Kushi, and Y. Fukuhara. Formation of mutagens by heating foods and model systems 55

R. T. Taylor, E. Fultz, and M. Knize. Mutagen formation in a model beef supernatant fraction. IV. Properties of the system 59

C. A. Krone, S. M. J. Yeh, and W. T. Iwaoka. Mutagen formation during commercial processing of foods 75

M. Nagao, Y. Fujita, K. Wakabayashi, H. Nukaya, T. Kosuge, and T. Sugimura. Mutagens in coffee and other beverages 89

F. T. Hatch. A current genotoxicity database for heterocyclic thermic food mutagens. I. Genetically relevant endpoints 93

S. Sato, C. Negishi, A. Umemoto, and T. Sugimura. Metabolic aspects of pyrolysis mutagens in food 105

H. Kasai and S. Nishimura. Hydroxylation of guanine in nucleosides and DNA at the C-8 position by heated glucose and oxygen radical-forming agents 111

M. Terada, M. Nagao, M. Nakayasu, H. Sakamoto, F. Nakasato, and T. Sugimura. Mutagenic activities of heterocyclic amines in Chinese hamster lung cells in culture 117

J. H. Weisburger, W. S. Barnes, C. A. Lovelette, C. Tong, T. Tanaka, and G. M. Williams. Genotoxicity, carcinogenicity, and mode of action of the fried food mutagen 2-amino-3-methylimidazo[4,5-f]quinoline (IQ) 121

H. Ohgaki, H. Hasegawa, T. Kato, M. Suenaga, M. Ubukata, S. Sato, S. Takayama, and T. Sugimura. Carcinogenicity in mice and rats of heterocyclic amines in cooked foods 129

N. Nakatani, R. Inatani, H. Ohta, and A. Nishioka. Chemical constituents of peppers (*Piper spp.*) and application to food preservation: naturally occurring antioxidative compounds 135

M. Kuratsune, M. Ikeda, and T. Hayashi. Epidemiologic studies on possible health effects of intake of pyrolyzates of foods, with reference to mortality among Japanese Seventh-Day Adventists 143

R. S. U. Baker, I. Darnton-Hill, A. M. Bonin, A. Arlauskas, C. Braithwaite, M. Wootton, and A. S. Truswell. Urine mutagenicity as an indicator of exposure to dietary mutagens formed during cooking of foods 147

F. J. de Serres, E. Zeiger, and F. T. Hatch. Future directions and research priorities for food mutagens ... 153
